SUMMARY

Passionate Full Stack Developer with a strong foundation in C++, JavaScript, TypeScript, Rust, and Java, building scalable Web2 and Web3 applications. Skilled in React, Node.js, Express, MongoDB, PostgreSQL, Supabase, Flutter, React Native, and blockchain technologies. I enjoy transforming complex ideas into clean, user-focused digital experiences. Currently a second-year Computer Science student continuously exploring new technologies and improving problem-solving skills to build impactful products.

EDUCATION

2024 – 2028	B.Tech in Computer Science , NMAM Institute of Technology, Nitte	CGPA: 8.9/10
2023	Class 12th (CBSE Board)	86%
2021	Class 10th (CBSE Board)	90%

PROJECTS

CodeArena — The Web3 Coding Battleground Live Demo

Solana-powered platform where developers stake SOL on their coding streaks. Stay consistent, earn rewards — miss a day, get slashed. Built using **React, Vite, Solana, TypeScript, Tailwind CSS, and Web3 wallet integration**.

TokenEstate Live Demo

Real estate tokenization platform allowing users to buy and sell fractional property ownership similar to stock markets. Built using **React, Vite, Rust, and MongoDB**. Features a high-performance interface and secure backend logic for handling asset data.

ChefBook Live Demo

Chef booking platform with reusable components and modern responsive UI using **Tailwind**. Focused on clean UX and high performance.

Track Bharat Live Demo

Political transparency platform showing promises vs. progress by leaders. Features pincode search, issue voting, and map-based data visualization using **React, Supabase, Tailwind, and PostgreSQL**. Focused on scalability and data integrity.

StakeFlow Live Demo

Decentralized staking dashboard for tracking rewards and secure wallet integration. Built using **React, TypeScript, Solidity, and Ethers.js**. Implemented reusable UI components and real-time state management.

Vill Design Website Clone Live Demo

Developed a pixel-perfect clone of the Vill Design official website to demonstrate frontend precision and full-stack capabilities. Built using **React, Tailwind, and modern deployment practices**, focusing on responsive UI, clean component structure, and performance optimization.

SKILLS

Languages: C++, JavaScript, TypeScript, Java, Rust, Python, SQL

Frontend: HTML/CSS, Tailwind, React.js, React Native

Backend: Node.js, Express.js, MongoDB, PostgreSQL, REST APIs

DevOps & Tools: Git, GitHub, Docker, AWS, Supabase, Firebase

Concepts: System Design, Scalable Architecture, Database Modeling, Refactoring, Clean Code Practices

Soft Skills: Problem-solving, Proactiveness, Communication, Teamwork, Startup Mindset

RELEVANT EXPERIENCE

Open Source & College Projects 2024 – Present

- Delivered production-style full-stack applications with secure authentication, real-time updates, and scalable architecture.
- Designed database schemas, optimized data flow, and built reliable application workflows for maintainable development.
- Conducted sessions in college and university on different tech stacks, sharing practical knowledge on modern development tools and workflows.
- Practiced agile collaboration, version control, and structured development workflows similar to startup environments.

ACHIEVEMENTS

- **1st Place Winner** – HP (Hewlett Packard) College Hackathon for building an innovative technical solution among competing student teams.
- Received a **\$250 grant from Superteam India** for contribution and project work in the blockchain ecosystem.
- **Track Winner in Blockchain Technology** at **Alvas Institute of Technology**.
- Top 100 Candidate in JETRO Talent for Japan 2025 among 5000+ candidates across India.
- Top 10 Finalist in M# Techtatva Hackathon 2025 (MIT Manipal) among 900+ teams.
- Codeforces Competitive Programming Rating: **1401 (Specialist)**.
- Participated in Colosseum Hackathon 2025 and 2026.
- Completed Full-Stack Web Development Course (Udemy).
